-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12 August 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-19 and 21-36 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-19 and 21-36 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.
2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
3. Claims 1-3, 9, 12, 17-19, 22-24, 28-30, and 32-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kipp (5,890,136) in view of Horwitz et al. (6,496,806).
4. With respect to Claims 1, 11, 22, 32 and 36: Kipp discloses the use of an order database (26) that is used to pull inventory and for shipping (See abstract), where the orders are tracked (Column 2, lines 34-37) through an order database (Column 7, lines 16-18) and tracks the articles (Column 5, lines 47-64). However, Kipp fails to disclose the use of a unit order database that includes a record for each unit of each item of the order. Horwitz discloses the use of a method and system for tracking each individual item of a cluster of items (See abstract) that

Art Unit: 3629

can be used for purchase order systems (Column 1, lines 17-63), where a record of each item is stored in a database, and each record is linked through a cluster, so that when the status of one item changes, the cluster changes (see Column 4, lines 40-57, Column 1, lines 1-20, and Column 8, lines 17-24). It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Kipp, to include the method and system of tracking each individual item of a cluster, as disclosed by Horwitz, in order to more accurately track items that are moved, handled or processed in clusters. (See Horwitz, Column 1)

5. Kipp and Horwitz discloses the use of individual units of an order being tracked separately, and when each individual record of the unit changes, then the cluster (or order) would change. The combination of Kipp and Horwitz fails to disclose the unit order database and order database be separate databases.

6. At the time the invention was made, it would have been an obvious matter of design choice to a person of ordinary skill in the art to have the unit order database and order database be separate databases because Applicant has not disclosed that have separate databases provides an advantage or solves a stated problem. One of ordinary skill in the art, furthermore, would have expected Applicant's invention to perform equally well with the centralized database taught by Horwitz because both methods perform the same function of tracking items on a unit level, and updating on an individual basis.

7. Therefore, it would have been an obvious matter of design choice to modify Kipp and Horwitz to have the centralized database, be two separate databases.

8. With respect to Claims 2, 12, 23, 33 and 36: See Horwitz, Column 6, lines 9-19.

Art Unit: 3629

9. With respect to Claims 3, 13, 24 and 34: See Horwitz, Column 6, lines 28-50.
10. With respect to Claims 7, 17 and 28: Horwitz discloses the updating of the database that contains the items happens when the items are moved from one storage location to another storage location (See Column 11, line 41 to Column 12, line 64). The examiner considers this to be a periodic basis, since the pallets are not moved on a continuous basis, but sit in storage and inventory.
11. With respect to Claims 8, 18 and 29: The items in Horwitz are tracked on a real time basis (column 12, lines 65), therefore multiple times a day, which the examiner considers to be done on a daily basis.
12. With respect to Claims 9, 19 and 30: See Column 12, lines 1-67.
13. Claims 4-6, 10, 13-16, 21, 25-27, 31 and 35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kipp and Horwitz et al. as applied to claims 1, 11, 22 and 32 above, and further in view of Peachey-Kountz et al. (6,463,345).
14. With respect to Claims 4-6, 10, 13-16, 21, 25-27, 31 and 35: Kipp and Horwitz discloses the use of a purchase order and having a record for each item in an order that is shipped, but fail to disclose the order can be modified to increase or decrease the quantity of the order, and either adding a unit record or setting a record to cancelled. Peachey-Kountz discloses the use of orders where the quantity of items are changed and modified due to backorders or cancellation of orders (see Figures 5-7, Column 11, lines 53-67), and the record status is updated to reflect the change, (see Figures 5 and 6 with corresponding detailed description). It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Kipp and

Art Unit: 3629

Horwitz, to include the capability of changing the order, and the records reflecting the change, in order to provide an improved reporting system. (See Peachey-Kountz, Column 9)

Response to Arguments

15. Applicant's arguments with respect to claims 1-36 have been considered but are moot in view of the new ground(s) of rejection. The rejection above has been modified to include the newly added limitation where the databases are separate.

16. With response to Applicant's arguments that Horwitz does not disclose that each unit can be tracked separately: Horwitz discloses that each unit has its own ID, and is grouped with a cluster and then each cluster is given ID. However each unit retains its own ID, and ID record, therefore fully capable of being tracked on a unit level. The ID tags of Horwitz are linked, but Horwitz specifically states a "method and system for tracking each item in a cluster of items", therefore each unit is tracked separately. Therefor the rejection stands as stated above.

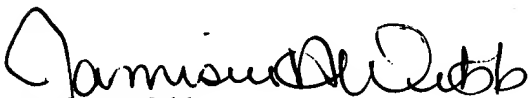

Conclusion

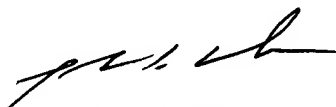

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jamisue A. Webb whose telephone number is (571) 272-6811. The examiner can normally be reached on M-F (7:30 - 4:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Weiss can be reached on (571) 272-6812. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
